## Seminar description

AO Trauma Masters Seminar—Polytrauma, damage control, and fractures of the ankle and knee is a two days seminar who addresses some of the burning questions regarding special clinical situations and particularly difficult articular fractures. The seminar will be taught in a modular format with 4 modules over two days. It is an interactive event with a small number of key note lectures and many case discussions as well as panel discussions helping participants to understand decision-making process and management skills.

## Target participants

The AO Trauma Seminar is targeted at physicians in orthopedic training who have completed the AO Trauma Basic Principles and Advanced Principles courses. It is also open to anyone interested in improving their knowledge and skills in the treatment of articular fractures and polytrauma patients. Participants must be willing to share their ideas and be able to communicate well in English.

## Course fee

EUR 185

For more information and registration, please visit:

## Learning objectives

At the end of the seminar, participants should be able to:

- Define and assess polytrauma patients with associated bone lesions
- Identify the situations when it is not possible to perform early total care and understand when and how to perform damage control orthopedics
- Recognize and evaluate special problems of the fractures around the knee and ankle and to know how to solve them
- Discuss and analyze complicated clinical cases with these fractures and choose the optimal treatment strategy
